

## EQUINE SECURITY & INSECT SCREENS

SheerGuard SA has a wide range of innovative horse friendly security solutions to secure stables, barns and tack rooms - protecting your horses and equipment from intruders and insects.

As well as offering stable yard security, our products provide insect control to help prevent the spread of African Horse Sickness (AHS), the West Nile Virus (WNV) and Equine Encephalosis Virus (EEV).

**MeshGuard** is a clear security barrier and insect solution, manufactured using high strength aluminium alloys and stainless-steel clear mesh. MeshGuard is strong and durable, allows for natural air flow and can be used to secure any window or door opening. This product is ideal for stables and tack rooms.

**MozziGuard Insect Screens** have been designed to protect stables from flying and crawling insects. The fibreglass woven mesh is transparent, allows in light, natural airflow, reduces dust and can easily be removed and refitted for cleaning. This product is ideal for "out of reach" openings within the stables and tack rooms.
